ATM ENGINEERING TRAINING

Hallenweg 8
NL-5683 CT Best

sales@insureatm.com
www.insureatm.com

Our comprehensive, flexible training program is focused on helping our customers to develop a technical workforce that is ready to meet any challenge. Our updated technical knowledge with the latest models of OEMs and qualified skills permits us to offer specific and tailor made training courses of a high standard. The training facilities in our premise are multi-branded and cover a large variety of available ATM-machines and parts of the latest types of NCR and Diebold Nixdorf

The training classes we offer are on all entry-level and are concerning the use of ATMs and their installation, removal, upgrading, servicing and repair. Courses named testing software review, hardware diagnostic and major issue overview. The repair exercises are based on faults of main spare parts, GBNA/CCDM/ENA units, escrow units and recognition units etc. First and second line maintenance can be offered into details. We use live machines and can give the engineer also the opportunity to see how an ATM is brought into service.

With our Diagnostic software, you can diagnose NCR 58xx Personas and 66xx SelfServ ATMs in the field, authorize new USB modules in NCR SelfServ ATMs, and diagnose the health of NCR ATM modules in repair centers.

When the ATM training has been attended according all course requirements and is completed successfully, the participant will be graduated and will receive a Certificate of Competence.

ATM Models

NCR 58XX BNA 2/3
